St. Francis Xavier Trip to RHS Wisley

As a supplement to the horticulture programme we run at the St. Francis Xavier Centre we recently visited RHS Wisley. With arguably the best weather of the year yet on our side we transported our green fingers down the A3 to the gardens. For the first part of the day the pupils took part in a 'Horticulture Workshop' where they learnt further information about sowing seeds, pricking out and preparing soil. After a short lunchbreak we then had the afternoon to explore the stunning grounds.

SEND Physical Education Project at St. Mary's University

Each year the PGCE PE students at St. Mary's University run an SEND Project where they invite pupils from local schools to experience some 'Social PE'. It was a great opportunity for our St. Francis Xavier pupils to interact with other pupils from different schools. The project was spread over a four-week period and each week the pupils worked with different PGCE students encountering many problem solving activities.
