Ideas for Design technology activities for Easter break:

- *Create a sketch book.* Create a sketch book – any little book. Collect images, articles, pictures, sketch, paint etc. This can be something you can use for ideas or just a doodling area where you practise your sketches. Some quote that may inspire you – "Good ideas can come at any time, so always have a pencil to hand". "How pretty a sketch looks aren't important. It's all about communicating ideas to those around you".
- *Design and develop a board game.* Create a board game for your family to play. You can try and make it using recycled items in your house.
- *Design a make a mini marble or ball run.* How long can it go? How can you make it roll the longest time? Are there any creative obstacles you can add? Ideas below

- *Create a map of your area.* Create a map of your local area in the style of Harry Beck (London Underground) - https://tfl.gov.uk/corporate/about-tfl/culture-and-heritage/art-and-design/harry-becks-tube-map
- *Try origami.* Look on you tube at different origami tutorials. Challenge yourself and make a scene of 3D items made out of paper.
- **What can you do with a plastic bottle?**
  There are many creative people out there and I'd like to see just what you can do with a plastic bottle – ideas below.
